

Skills

Frontend Development
JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, React (Hooks, Router, Vite), Tailwind CSS, Material UI

◆ ◆ ◆ ◇ ◇

Backend & Fullstack Development
Node.js, Express.js, MongoDB, Mongoose, PostgreSQL. Built REST APIs, used JWT and Clerk for auth, real-time features with Socket.io

◆ ◆ ◇ ◇ ◇

Developer Tools & Workflow
Git, GitHub, Vite, Postman, Clerk, Agile methodologies Experienced with debugging, version control, and MVP delivery practices

◆ ◆ ◇ ◇ ◇

Interests

Frontend Design, UI/UX, Tech Blogging, Coding Challenges
UI/UX, Aesthetics, Web Animation, Figma, Hackathons, Creativity, Design Thinking

Languages

Bulgarian
Native speaker; fluent in speaking, reading, and writing.

◆ ◆ ◆ ◆ ◆

English
Proficient in professional and technical communication. Used daily in coding, documentation, and team collaboration.

Profiles

🔗 [DenislavaVM](#)

Summary

I'm a passionate junior Front-end developer with strong hands-on experience in building responsive and user-centric web apps using React, JavaScript (ES6+), and CSS frameworks. I’ve built and deployed fullstack projects with REST APIs, MongoDB, and authentication. With a background in software engineering and DevOps fundamentals, I write clean, maintainable code and love turning complex problems into elegant solutions. I am currently open to remote or hybrid roles where I can grow with a supportive team.

Experience

AiA West LLC **March 2018 – October 2020**
Sales Consultant Sofia, Bulgaria

As a Sales Consultant at AiA West LLC, I engaged with clients to understand their needs and provide tailored product recommendations. I consistently met or exceeded monthly sales targets, built strong customer relationships, and contributed to a collaborative team environment. This role developed my communication, problem-solving, and client service skills—skills I now apply in tech through user-focused development.

Education

First Secondary School “St. Sedmochislenitsi” **Sept 2012 – May 2017**
General Education High School Diploma

Certifications

Containers and Cloud **April 2025**
SoftUni

🔗 <https://softuni.bg/Certificates/Details/242514/bfd828fb>

Learned containerization with Docker and orchestration using Kubernetes. Covered cloud deployment workflows.

Software Engineering and DevOps **March 2025**

SoftUni

🔗 <https://softuni.bg/certificates/details/238909/53c4218e>

Covered CI/CD pipelines, system design, and scalable architecture.

ReactJS **August 2024**

SoftUni

🔗 <https://softuni.bg/certificates/details/223810/58d51e11>

Focused on building SPAs using React, Router, and Hooks. Emphasis on performance, component logic, and Vite.

PostgreSQL **June 2024**

SoftUni

🔗 <https://softuni.bg/certificates/details/217236/a291eb9c>

Designed and queried relational databases. Covered joins, indexing, normalization, and stored procedures.

JavaScript - Front-End **April 2024**

SoftUni

🔗 <https://softuni.bg/certificates/details/212549/6dde2125>

Frontend-focused JavaScript course with DOM manipulation, forms, and event-driven interfaces.

HTML & CSS **February 2024**

SoftUni

🔗 <https://softuni.bg/certificates/details/205545/f46c030e>

Built responsive UIs with semantic HTML and modern CSS including Flexbox and Grid.

JavaScript - Advanced **June 2023**

SoftUni

🔗 <https://softuni.bg/certificates/details/174309/64722c87>

Covered object-oriented JS, classes, closures, and modular design patterns.

Programming Fundamentals (JavaScript) **April 2023**

SoftUni

🔗 <https://softuni.bg/certificates/details/166145/fbefd77e>

Focused on loops, arrays, functions, and problem solving in JS. Excellent foundation course.

Programming Basics **October 2022**

SoftUni

🔗 <https://softuni.bg/Certificates/Details/145938/1520263f>

Introduced programming fundamentals with basic algorithms and logic building in JavaScript.

Projects

Tic-Tac-Toe Game

A web-based PvP and AI-powered game with custom symbols, difficulty levels, sound effects, keyboard support, and responsive layout.

🔗 <https://denislavvm.github.io/TicTacToe/>

Built using vanilla **HTML, CSS, and JavaScript**. Features **Minimax AI**, event-driven design, and accessible keyboard controls.

JavaScript, HTML5, CSS3, Minimax AI, Responsive Design, Game Logic, Keyboard Support

Weatherly

A weather dashboard app that shows real-time data, 5-day forecasts, autocomplete search, and dark/light mode support.

🔗 <https://weatherly-tau-three.vercel.app/>

Fullstack app using **React + Node.js + Express + Axios**. Integrates **OpenWeather** and **GeoDB** APIs.

React, Node.js, Express, Axios, REST API, Dark Mode, Autocomplete

Notes Hub

A full-featured notes app with authentication, tagging, pinning, dark mode, and sharing via email.

🔗 <https://notes-hub-mern.vercel.app>

MERN app built with **React, Material UI, Express, MongoDB**, and **JWT**. Includes CRUD functionality and user auth.

React, MongoDB, Express, JWT, Authentication, Material UI, CRUD

Spotify Clone

A fullstack music streaming app with real-time chat, song playback, and user/admin roles.

🔗 <https://spotify-clone-orcin-psi.vercel.app/>

Built with **React, Zustand, Tailwind, Node.js, Socket.io, Clerk**. Supports **authentication**, presence tracking, and chat features.

React, Tailwind CSS, Socket.io, Real-Time, Clerk, Authentication, Zustand
